

Crafting refined concrete elements for modern living. From our Pretoria East workshop, we design and produce tables and furniture that bring a clean, minimalist aesthetic to any space.

Driven by high-performance concrete technology and years of material expertise, our collection is available at wholesale prices to individual buyers, designers, and retail partners across South Africa.

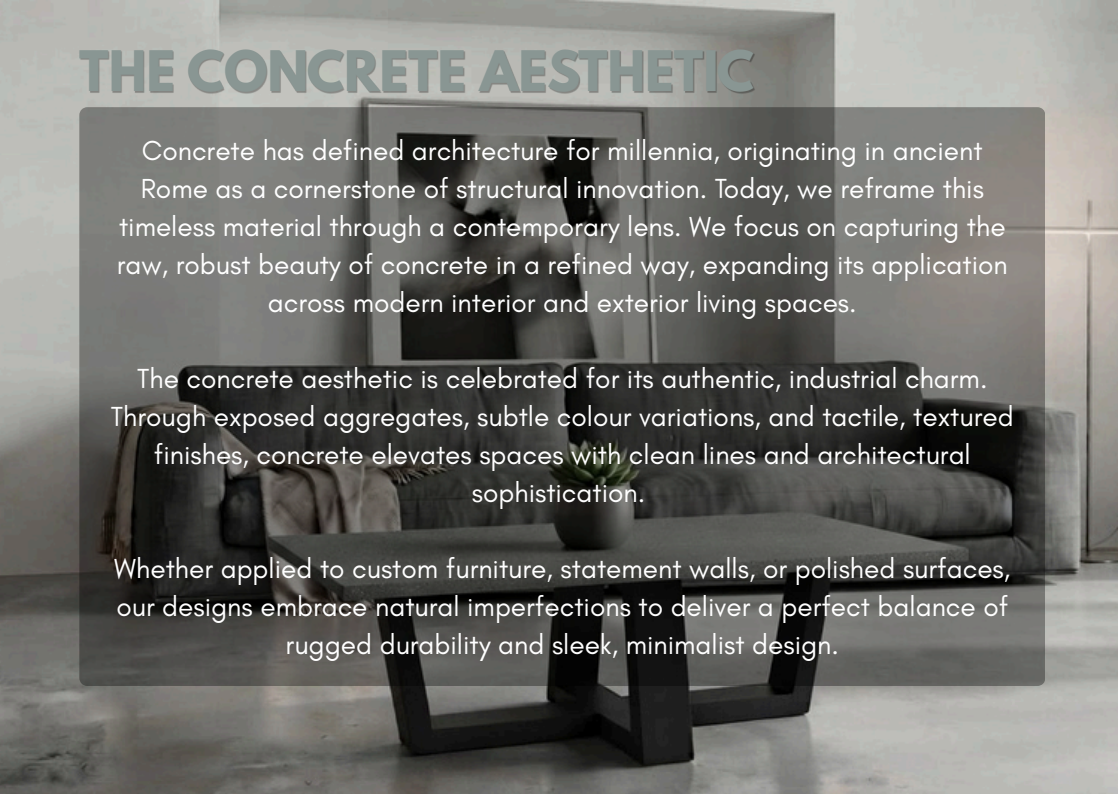

We take pride in building local craftsmanship, empowering our workforce, and expanding community skill sets with every piece we make.

WHERE IT ALL BEGAN...

Our story began in late 2017 during a full home renovation. Kitchen countertops can make or break a space, and faced with the search for the perfect surface, we took a bold chance on a new idea: custom concrete countertops.

That single project ignited our passion for the material, proving its versatility and distinct aesthetic and we haven't looked back since.

THE CONCRETE AESTHETIC

The background image shows a minimalist living room. A dark, possibly black or dark brown, leather sofa is positioned against a light-colored wall. In front of the sofa is a low, dark-colored coffee table with a thick, rectangular top and a base made of several thick, dark, rectangular legs. On the coffee table sits a small potted plant. Behind the sofa, a large, square-framed abstract painting is displayed on the wall. The floor appears to be a light-colored, polished concrete. The overall aesthetic is clean, modern, and industrial.

Concrete has defined architecture for millennia, originating in ancient Rome as a cornerstone of structural innovation. Today, we reframe this timeless material through a contemporary lens. We focus on capturing the raw, robust beauty of concrete in a refined way, expanding its application across modern interior and exterior living spaces.

The concrete aesthetic is celebrated for its authentic, industrial charm. Through exposed aggregates, subtle colour variations, and tactile, textured finishes, concrete elevates spaces with clean lines and architectural sophistication.

Whether applied to custom furniture, statement walls, or polished surfaces, our designs embrace natural imperfections to deliver a perfect balance of rugged durability and sleek, minimalist design.

THE DINING TABLE

A dining table is far more than a functional piece of furniture. It is the focal point of the home and a symbol of togetherness. It creates a natural hub where family and friends gather to share meals, exchange stories, and build lasting memories.

Beyond its daily presence, a dining table serves as an expression of personal style, anchoring the character and architectural tone of the room it inhabits. Every piece is crafted not just as a structural element, but as a backdrop for shared moments and meaningful conversations.

Let's craft a bespoke piece for your space.
